Subject Index of Volume 48

Aluminium
deposition of (Ti, Al)N coatings on plasma nitrided steel, 19
high dose, low energy implantation of nitrogen in silicon, niobium and aluminium, 97
plasma deposition of (Ti, Al)N coatings at various magnetron discharge power levels, 25
the development of the PVD coating TiAlN as a commercial coating for cutting tools, 175
the properties of plasma sprayed aluminium–aluminium oxide cermets, 219
Amorphous solid systems
amorphous solid systems: diamond-like carbon, carbides, films and multilayer structures, 193
Arsenic
tailoring of Schottky barrier heights in Si and GaAs using metal alloys, 233

Bond strength tests
improved methods for testing bond and intrinsic strength and fatigue of thermally sprayed metallic and ceramic coatings, 103
Boron
structural characterization of vanadized boride layers on steel, 249
synthesis of BN films by ion beam deposition, 237
ultrahard coatings from Ti–BN multilayers and by co-sputtering, 169

Calcium carbonate
high performance metallic multilayer thin films on modified polypropylene with calcium carbonate fillers, 155
Carbon
evaluation of some mechanical properties of SiC films deposited on steel by plasma-assisted chemical vapour deposition from tetramethylsilane, 121
friction of tungsten carbide–cobalt coatings obtained by means of plasma spraying, 241
Ceramics
improved methods for testing bond and intrinsic strength and fatigue of thermally sprayed metallic and ceramic coatings, 103
the properties of plasma sprayed aluminium–aluminium oxide cermets, 219
Cobalt
the effect of pulse parameters on the electrodeposition of Co–Ni alloys, 205
wear behaviour of cobalt-based alloys in laser surface cladding, 225
Computer simulation
computer simulation of plasma-sprayed coatings I. Coatings deposition model, 137
computer simulation of plasma-sprayed coatings II. Effective bulk properties and thermal stress calculations, 147
Corrosion-resistant coatings
assessment of corrosion-resistant coatings for a depleted uranium–0.75 titanium alloy, 31

Diamond film deposition
diamond thin film growth on silicon at temperatures between 500 and 600 °C using an electron cyclotron resonance microwave plasma source, 69
Diamond-coated tools
industrial application of crystalline diamond-coated tools, 253
Diamond-like carbon
amorphous solid systems: diamond-like carbon, carbides, films and multilayer structures, 193
Diamond-like films
amorphous solid systems: diamond-like carbon, carbides, films and multilayer structures, 193
on some properties and applications of tungsten-alloyed amorphous carbon films, 199
properties of diamond-like films formed by ion-assisted methods for multilayer structures, 189

Electrodeposition
the effect of pulse parameters on the electrodeposition of Co–Ni alloys, 205
Electron beam method
electron beam induced modification of nickel coated molybdenum surfaces, 211
Electron cyclotron resonance
diamond thin film growth on silicon at temperatures between 500 and 600 °C using an electron cyclotron resonance microwave plasma source, 69
Erosion resistance
wear of pyrolytic tin oxide and anodized aluminium oxide coatings on aluminium, 41

Friction
friction of tungsten carbide–cobalt coatings obtained by means of plasma spraying, 241

Gallium
tailoring of Schottky barrier heights in Si and GaAs using metal alloys, 233

Hard coatings
deposition of (Ti, Al)N coatings on plasma nitrided steel, 19
plasma deposition of (Ti, Al)N coatings at various magnetron discharge power levels, 25
tribological performance of hard carbon coatings on 440C bearing steel, 113
wear of pyrolytic tin oxide and anodized aluminium oxide coatings on aluminium, 41
Heat-resistant coatings
magnetron sputter deposition of heat-resistant coatings on high temperature alloys, 13

Ion beam deposition
synthesis of BN films by ion beam deposition, 237
Ion-assisted deposition
properties of diamond-like films formed by ion-assisted methods for multilayer structures, 189

Laser surface cladding
wear behaviour of cobalt-based alloys in laser surface cladding, 225

Magnetron discharge
plasma deposition of (Ti, Al)N coatings at various magnetron discharge power levels, 25
Mechanical properties
evaluation of some mechanical properties of SiC films deposited on steel by plasma-assisted chemical vapour deposition from tetramethylsilane, 121
Metallic coatings
improved methods for testing bond and intrinsic strength and fatigue of thermally sprayed metallic and ceramic coatings, 103
Microdiffraction
surface phase definition by microdiffractometry in ion-nitrided α–β–Ti alloys, 131
Microscratch test
microscratch testing to characterize the adhesion of thin layers, 1
Microstructures
microstructures of TiN films grown by various physical vapour deposition techniques, 51
Molybdenum
electron beam induced modification of nickel coated molybdenum surfaces, 211
Multilayer structures
amorphous solid systems: diamond-like carbon, carbides, films and multilayer structures, 193
properties of diamond-like films formed by ion-assisted methods for multilayer structures, 189

Nickel
characterization and comparison of TiN layers deposited by different physical vapour deposition processes, 181
electron beam induced modification of nickel coated molybdenum surfaces, 211
the effect of pulse parameters on the electrodeposition of Co–Ni alloys, 205
TiN coatings on mild steel substrates with electroless nickel as an interlayer, 163
Niobium
high dose, low energy implantation of nitrogen in silicon, niobium and aluminium, 97
Nitridation
surface phase definition by microdiffractometry in ion-nitrided α–β–Ti alloys, 131
Nitrides
deposition of (Ti, Al)N coatings on plasma nitrided steel, 19
plasma deposition of (Ti, Al)N coatings at various magnetron discharge power levels, 25
Nitrogen
high dose, low energy implantation of nitrogen in silicon, niobium and aluminium, 97
synthesis of BN films by ion beam deposition, 237
the development of the PVD coating TiAlN as a commercial coating for cutting tools, 175
ultrahard coatings from Ti–BN multilayers and by co-sputtering, 169

Oxides
wear of pyrolytic tin oxide and anodized aluminium oxide coatings on aluminium, 41

Physical vapour deposition
characterization and comparison of TiN layers deposited by different physical vapour deposition processes, 181
the unbalanced magnetron: current status of development, 81
microstructures of TiN films grown by various physical vapour deposition techniques, 51
Plasma method
evaluation of some mechanical properties of SiC films deposited on steel by plasma-assisted chemical vapour deposition from tetramethylsilane, 121
Plasma spraying
friction of tungsten carbide-cobalt coatings obtained by means of plasma spraying, 241
the properties of plasma sprayed aluminium–aluminium oxide cermets, 219
Plasma vapour deposition
assessment of corrosion-resistant coatings for a depleted uranium–0.75 titanium alloy, 31
the development of the PVD coating TiAlN as a commercial coating for cutting tools, 175
Plasma-sprayed coatings
application of coatings using pulsed-plasma flows, 7
computer simulation of plasma-sprayed coatings I. Coatings deposition model, 137
computer simulation of plasma-sprayed coatings II. Effective bulk properties and thermal stress calculations, 147
Polypropylene
high performance metallic multilayer thin films on modified polypropylene with calcium carbonate fillers, 155
Pulse parameters
the effect of pulse parameters on the electrodeposition of Co–Ni alloys, 205

Schottky barriers
tailoring of Schottky barrier heights in Si and GaAs using metal alloys, 233
Silicon
diamond thin film growth on silicon at temperatures between 500 and 600 °C using an electron cyclotron resonance microwave plasma source, 69
evaluation of some mechanical properties of SiC films deposited on steel by plasma-assisted chemical vapour deposition from tetramethylsilane, 121
high dose, low energy implantation of nitrogen in silicon, niobium and aluminium, 97
tailoring of Schottky barrier heights in Si and GaAs using metal alloys, 233
Sputter deposition
magnetron sputter deposition of heat-resistant coatings on high temperature alloys, 13
Sputtering
ultrahard coatings from Ti–BN multilayers and by co-sputtering, 169
Steel
deposition of (Ti, Al)N coatings on plasma nitrided steel, 19
evaluation of some mechanical properties of SiC films deposited on steel by plasma-assisted chemical vapour deposition from tetramethylsilane, 121
structural characterization of vanadized boride layers on steel, 249
TiN coatings on mild steel substrates with electroless nickel as an interlayer, 163
tribological performance of hard carbon coatings on 440C bearing steel, 113

Structure
structural characterization of vanadized boride layers on steel, 249
Surface phase definition
surface phase definition by microdiffractometry in ion-nitrided α–β–Ti alloys, 131

Thermal stress
computer simulation of plasma-sprayed coatings
II. Effective bulk properties and thermal stress calculations, 147
Thin coatings
microscratch testing to characterize the adhesion of thin layers, 1
Thin films
high performance metallic multilayer thin films on modified polypropylene with calcium carbonate fillers, 155
Titanium
assessment of corrosion-resistant coatings for a depleted uranium–0.75 titanium alloy, 31
characterization and comparison of TiN layers deposited by different physical vapour deposition processes, 181
deposition of (Ti, Al)N coatings on plasma nitrided steel, 19
microstructures of TiN films grown by various physical vapour deposition techniques, 51
plasma deposition of (Ti, Al)N coatings at various magnetron discharge power levels, 25
surface phase definition by microdiffractometry in ion-nitrided α–β–Ti alloys, 131
the development of the PVD coating TiAlN as a commercial coating for cutting tools, 175
TiN coatings on mild steel substrates with electroless nickel as an interlayer, 163
ultrahard coatings from Ti–BN multilayers and by co-sputtering, 169
Tribology
friction of tungsten carbide-cobalt coatings obtained by means of plasma spraying, 241
tribological performance of hard carbon coatings on 440C bearing steel, 113
Tungsten
friction of tungsten carbide–cobalt coatings obtained by means of plasma spraying, 241
on some properties and applications of tungsten-alloyed amorphous carbon films, 199

Ultrahard coatings
ultrahard coatings from Ti–BN multilayers and by co-sputtering, 169
Uranium
assessment of corrosion-resistant coatings for a depleted uranium–0.75 titanium alloy, 31

Wear behaviour
wear behaviour of cobalt-based alloys in laser surface cladding, 225
